

U.S. Department of Energy

## A Regional Approach to EV Adoption and Infrastructure

Mark-Anthony Smith

Southeast Florida Clean Cities Coordinator

# Agenda

---

1. Discuss the Clean Cities Network
2. Discuss Merging of the Fleet and Consumer Space
3. Discuss a Regional Framework
4. Discuss Resiliency and Accessibility

# Merging of Spaces

Consumer  
Space

Fleet  
Space

# Regional Framework

Demystify  
and  
consolidate  
EV  
Procurement

- Information-Sharing
- Standards & Practices

Incentivize EV  
infrastructure  
investment  
by the private  
sector

- Abundance Theory

Creating a  
Complete  
Policy Suite

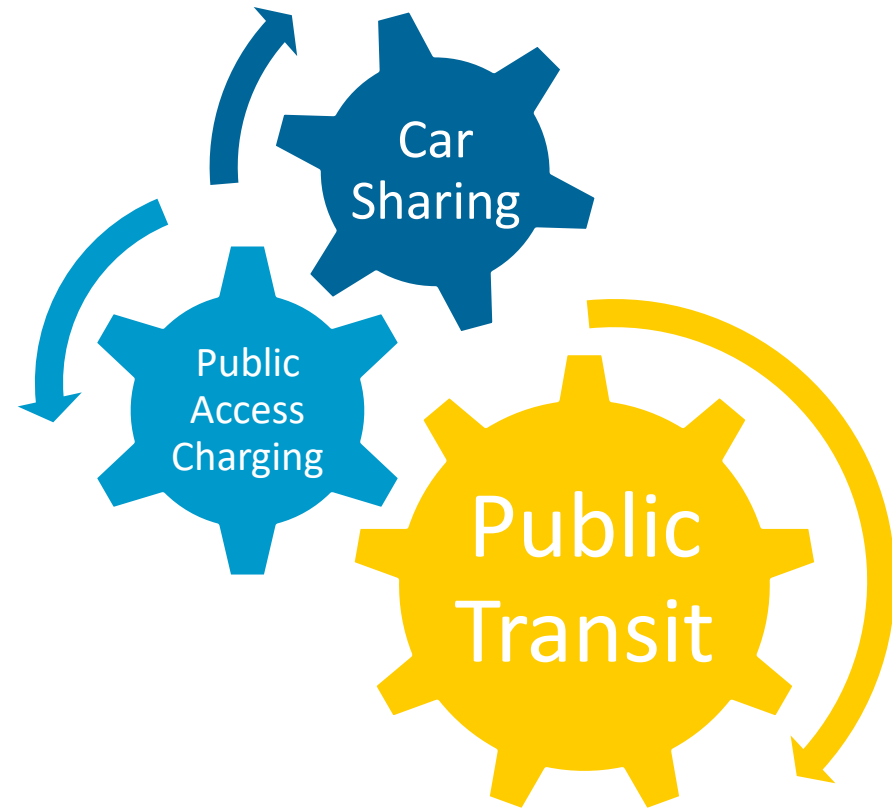

- City and County Charging Strategy
- Public Access Charging
- Building & Parking Requirements
- Share Regulatory Planning Strategies
- Taxi & Ride-Share Partnerships
- Autonomous Vehicle Planning

# Resilience and Accessibility

## EV Infrastructure

## EV Accessibility & Equity

# Final Thoughts

---

1. How do we merge the consumer and fleet space?
2. What does the private sector need to adopt this technology now?
3. What incentive programs can be enacted at the regional level?
4. What does resilient and accessible EV infrastructure in South Florida look like?

# Thank You!
