Page 1: Overview

## Q1

Local/Tribal Government

City of Boca Raton

---

## Q2

**Palm Beach County**

County

---

## Q3

Key Staff Contact

Name	<b>Lindsey Nieratka</b>
Title	<b>Sustainability Manager</b>
Email Address	<b>Inieratka@myboca.us</b>

---

Page 3: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

## Q4

**Yes**

Is your local/tribal government advancing activities related to Mitigation Action #1?

---

Page 4: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

## Q5

**Respondent skipped this question**

Please indicate as to why you've been unable to advance activities related to Mitigation Action #1? Please select all that apply.

---

## Q6

**Respondent skipped this question**

What resources could assist you in advancing this action?

---

Page 5: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q7**

**Yes**

Is your local/tribal government advancing Mitigation Action #1 through assessment/planning methods?

---

Page 6: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q8**

Provide a brief description of how Mitigation Action #1 is being advanced through assessment/planning methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

In 2020 the City completed a greenhouse gas inventory with a baseline year of 2018.

---

**Q9**

**Yes**

Is equity being embedded into Mitigation Action #1 through assessment/planning methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. For more guidance, visit the full document on the Compact website. Hire a staff person from within the community to manage projects related to this activity. Dedicate funds for multilingual communications and outreach. Provide multilingual reporting efforts (print and spoken word). Connect with other municipal departments providing services for low-income or elderly residents and explicitly investigate opportunities for mutual benefits. Ensure goals are shared with administration to create opportunities for collaboration. Provide racial equity training for key administrators. Ensure the inventory and/or goal setting document(s) is/are publicly available and is interpreted for commonly spoken languages in the municipality as well as screen-reader compatible. Provide a means to measure and compare results. Provide local communities the technology and infrastructure to ensure equal access to information. Include raw numbers in report to allow for independent analysis by community members. Create a public website with open data. To achieve mitigation goals, plan any project/program implementation to first benefit parts of the community which are most energy cost-burdened and/or exposed to air pollution impacts and ensure no additional costs are imposed on them related to implementation.

---

Page 7: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q10**

Please provide a brief explanation of the ways in which you are embedding equity into this action's assessment/planning methods?

The City has the inventory results posted on a publicly available website and in ADA compliant format and has established GHG targets in the sustainability action plan.

---

Page 8: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q11**

**No**

Is your local/tribal government advancing Mitigation Action #1 through program development methods?

---

Page 9: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q12**

**Respondent skipped this question**

Provide a brief description of how Mitigation Action #1 is being advanced through program development methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

---

**Q13**

**Respondent skipped this question**

Is equity being embedded into Mitigation Action #1 through program development methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Build partnerships with community-based organizations, HOAs, and community-based forums to help define, design, and advance the work as well as spread the word. Ensure that your partnerships have significant diversity at the table, representing different age groups, neighborhoods, and races/ethnicities present in your community. Prioritize neighborhoods historically home to communities of color that may have been left out of decision making. Include stakeholders from economic sectors in the community. Prioritize partnerships with others such as Florida Power & Light to purposefully deploy renewable energy in low- and moderate-income areas of municipality first. Stormwater ponds adjacent to major highways are an opportunity for this

---

Page 10: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q14**

Respondent skipped this question

Please provide a brief explanation of the ways in which you are embedding equity into this action's program development methods?

---

Page 11: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q15**

No

Is your local/tribal government advancing Mitigation Action #1 through policy methods?

Page 12: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q16**

Respondent skipped this question

Provide a brief description of how Mitigation Action #1 is being advanced through policy methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

---

**Q17**

Respondent skipped this question

Is equity being embedded into Mitigation Action #1 through policy methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Use a Racial Equity Toolkit to consider impacts before taking on any project. Establish a mechanism to regularly present progress to the residents/businesses to increase accountability and transparency. Ensure an equity first framework, so that GHG emission reductions do not come at the expense of low-income and/or communities of color. Seek out solutions with multiple benefits and explain what those are in your plan. This will help build bridges across municipal departments and lift up the relevance of climate actions across the community. Identify those entities within communities that are the highest producers of GHG and provide incentives for correction.

---

Page 13: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q18**

Respondent skipped this question

Please provide a brief explanation of the ways in which you are embedding equity into this action's policy methods?

---

Page 14: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q19**

**No**

Is your local/tribal government advancing Mitigation Action #1 through budget/investment methods?

---

Page 15: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q20**

**Respondent skipped this question**

Provide a brief description of how Mitigation Action #1 is being advanced through budget/investment methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

---

**Q21**

**Respondent skipped this question**

Is equity being embedded into Mitigation Action #1 through budget/investment methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Overlay any expenditures to advance this goal with census data on maps to ensure that expenditures/ investments are occurring in all areas of the municipality, positively impacting communities of all demographic make-ups. This will help a community stay accountable to not only investing in the area where they receive the most tax revenue or receive the most complaints. Ensure that investments related to this action are prioritized in communities that have the most need and/or have been disinvested. Include stipends/payments for volunteers in your budget. Make sure budgeted meeting costs include childcare, meals, and/or interpretation service.

---

Page 16: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q22**

**Respondent skipped this question**

Please provide a brief explanation of the ways in which you are embedding equity into this action's budget/investment methods?

---

Page 17: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q23**

**Yes**

Is your local/tribal government advancing Mitigation Action #1 through education/outreach/advocacy methods?

---

Page 18: Greenhouse Gas Emission Mitigation Priority Action #1 (GHG Targets)

**Q24**

Provide a brief description of how Mitigation Action #1 is being advanced through education/outreach/advocacy methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City provides ongoing education on the website and through workshops (virtual lately) on personal GHG reduction.

---

**Q25**

**No**

Is equity being embedded into Mitigation Action #1 through education/outreach/advocacy methods? Below are several suggested ways that a local /tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Ensure that there are at least monthly community meetings seeking input, not just education, through the life of the planning process, as well as annual update meetings on the municipality's progress during implementation. These meetings should take place at a variety of times, including evenings, and offer food and childcare to reduce barriers to attendance and participation. The meetings should be advertised by a community-based communications and outreach consultant who is from the community(ies) that you seek to target. The advertising efforts should include a variety of mediums and start at least a week prior to the meeting. The communications/outreach consultant should reach at least 300 people in advertising for the meeting. Ensure that education and outreach is available in multiple languages and information on the web is screen-reader compatible. Consider letting a community-based organization co-host a meeting or provide "meeting in a box" tools to let community-based organizations host their own event and report back. Utilize multiple engagement methods, e.g. online and in-person. Utilize existing relationships with other municipal departments. Devote resources to outreach in populations/neighborhoods frequently unengaged by government. Hire a volunteer that lives in that neighborhood or a community-based organization that works with that population. Acknowledge that elderly and low-income populations are less likely to engage with online promotion. Utilize in-person outreach (flyers, canvassing, announcement at an existing meeting, radio stations, TV, flyers at churches or community center, etc.) for these groups.

---

**Q33**

Respondent skipped this question

Is equity being embedded into Mitigation Action #2 through assessment/planning methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. If possible, prioritize hiring a people of color or women-owned local contractor or contractors for municipal energy efficiency programs. Require any municipal funding related to energy efficiency retrofits to be prioritized in communities that have been disinvested first. Encourage the use of EnergyStar Portfolio Manager, a free and publicly available online tool, for assessing energy efficiency of buildings. Have an explicit plan/criteria for site prioritization to avoid political pet projects. Conduct an assessment to identify energy use trends those who are most energy-cost burdened; prioritize areas which are most energy-cost burdened first. Identify areas with substandard housing and work to improve conditions, which can impact quality of life and energy cost burden. Engage communities most impacted by energy inefficiency in planning and prioritizing community projects/action. Include considerations for renters in programming/recommendations (non-construction projects)

---

Page 27: Greenhouse Gas Emission Mitigation Priority Action #2 (Building Efficiency)

**Q36**

Provide a brief description of how Mitigation Action #2 is being advanced through program development methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions

The City of Boca Raton has energy management systems in most City facilities.

---

**Q37**

**No**

Is equity being embedded into Mitigation Action #2 through program development methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Develop municipal partnership with the Solar Energy Loan Fund program (already in several municipalities across the state) in order to provide safe financing for low- and moderate-income communities. Develop partnerships with community members or organizations to help track energy efficiency data and prioritize improvements. Involve the people most impacted by energy inefficiency, build relationships, and co-create path forward. Partner with community-based organizations and organizations that provide direct services. Often times they are the first line of communication with community members and are great starting point for outreach to populations frequently unengaged by government. Partner with a Commissioner/Mayor to retrofit an affordable housing building. Target energy efficiency programs to parts of the community with the greatest need (defined as level of energy burden) as well as those large consumers. Invite community input early in the program development process. Host listening sessions, focus groups, and workshops to understand the energy needs in communities and what obstacles they are facing when trying to lower their energy usage and bills. Use this information to build programs and improve existing programs to address the identified needs.

**Respondent skipped this question**

Is equity being embedded into Mitigation Action #2 through policy methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Include extreme heat as a climate hazard to consider in any municipal resiliency plans. Institute cooling centers in the communities facing high indoor heat burden, air pollution, or urban heat island effect. Commit municipal savings from solar and energy efficiency being reinvested in wealth-building initiatives in disinvested communities. Ensure policies/permits for energy saving installations (green roofs, rooftop solar, storm hardening) are feasible, and if possible expedited and fee-free. Push for mandatory requirements over incentives in new construction. Provide property tax breaks for landlords who install energy conservation measures in rental housing. Require rental units to meet baseline levels of energy efficiency and make more stringent over time. Provide financial incentives for energy savings/alternative sources for qualified affordable housing providers/developers with an ultimate goal of having all affordable housing operating at net zero or better in 15 years.

---

**Q44**

Provide a brief description of how Mitigation Action #2 is being advanced through budget/investment methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City includes LEED certification in the budget for new buildings (e.g. Downtown Library). The City uses energy management systems in City facilities to reduce building energy use and upgrades facilities through routine renovations and maintenance.

---

**Q45**

**No**

Is equity being embedded into Mitigation Action #2 through budget/investment methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Allocate funds annually to pay for outreach campaigns to ensure all communities are aware of energy efficiency programs and assistance Offer financial incentives or financing programs to assist small business owners and/or cash strapped households in efficiency upgrades, and ensure people are aware of incentives Establish a municipality-based weatherization grant program (in addition to County programs) and fund it ( to include weather strapping and caulking to improve air seals, replacing or installing insulation, replacing windows, installing energy efficient air conditioning where it is not otherwise available, and other similar repairs free of charge) Fund energy efficient giveaways (LED light bulbs, smart power strips, weather stripping, etc.) at no cost to the resident and automatically provide to residents who are having a hard time paying their bills or have had utility shut-off Ensure maintenance of green infrastructure is considered in proposal so benefits endure Consider creating a Tax Increment Financing (TIF) program or other finance mechanism from successful economic sectors

---

Page 34: Greenhouse Gas Emissions Mitigation Priority Action #2 (Building Efficiency)

**Q48**

Provide a brief description of how Mitigation Action #2 is being advanced through education/outreach/advocacy methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City annually observes Daylight Hour. The City participated in the Palm Beach County solar co-op and provides education about solar energy systems on their website.

---

**Q49**

**No**

Is equity being embedded into Mitigation Action #2 through education/outreach/advocacy methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Ensure the elderly population, low-income communities, and others facing a high energy burden are aware of energy efficient options available to them (FPL rebates for programmable thermostats etc.) Ensure any information about this program is available in languages commonly spoken in the community and is also accessible to screen readers Ensure that outreach goes beyond posting a page on the website or a flyer. Conduct direct outreach to target communities that are most in need of programming. This could include robo-calls or text alerts to seniors, contact sheets from other social services, radio programs, piggybacking as part of public-school outreach efforts to parents, etc. All of these direct outreach approaches should be done in a multilingual format Work with local community-based organizations to be an education partner on energy efficiency behaviors and techniques/installations Provide educational resources and technical assistance to industry professionals, building owners and managers, and residents on all aspects of energy efficient building design, retrofits, and operations for new and existing buildings Create or adapt existing apprentice programs to build a skilled front-line workforce, focusing on building and maintaining alternative energy production and energy saving technologies. Give preference to people and projects in the areas of greatest un- and under-employment Advance the use and adoption of solar energy within government operations and community-wide

Respondent skipped this question

Is equity being embedded into Mitigation Action #3 through assessment/planning methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. For more guidance, visit the full document on the Compact website. If possible, prioritize hiring a people of color or women-owned local contractor or contractors or solar installation company. Require any municipal funding related to solar energy installations be prioritized in communities that have been disinvested. Assess the solar potential of all sites within the community in an equitable manner. Solar potential scores should not be based on property values or historic investments in the area, but rather on the potential for solar energy production and benefits to the surrounding community. Conduct solar feasibility assessment for all affordable housing owned by the municipality. Conduct solar feasibility for all critical infrastructure especially cooling centers/resilience hubs. Conduct an assessment to identify energy use trends, those within the community who are most energy-cost burdened, and prioritize projects for those areas/people. Identify areas with substandard housing and work to improve conditions which can impact quality of life and energy-cost burden. Consider establishing microgrids on municipally owned properties (such as public housing, libraries, and schools). The municipality should model best practices regarding solar energy i.e. identifying which parks, public places, or schools currently utilize or plan to utilize solar energy. Record the savings before and after installation.

The City is conducting an assessment of the fleet in order to better plan for EV adoption, in particular as we design and build a new fleet garage.

---

**Q81**

**Yes**

Is equity being embedded into Mitigation Action #4 through assessment/planning methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. For more guidance, visit the full document on the Compact website. If possible, prioritize hiring a people of color and women-owned contractor for EV infrastructure. If possible, donate EVs and PHEVs to community-based organizations once phased out of the municipal fleet. Commit to providing EV charging for free for at least a few years, if not indefinitely. Involve the community in evaluation of this action's progress. Assess success in this alongside data about demographics, location, and number of users. Assess the benefit and accessibility of proposed or existing EV infrastructure to low- and moderate-income communities and communities of color. Evaluate how low-income and/or communities of color access mobility and their relative air pollution exposure burden, and utilize this information to inform any EV strategy for the municipality. Ensure groups/individuals representing low-income communities, communities of color, and those with limited mobility are at the decision-making table.

---

Page 61: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q82**

Please provide a brief explanation of the ways in which you are embedding equity into this action's assessment/planning methods?

Reducing emissions from City fleet will improve air quality in the community and reduce health impacts to the City staff operating vehicles.

---

Page 62: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q83**

**Yes**

Is your local/tribal government advancing Mitigation Action #4 through program development methods?

---

Page 63: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q84**

Provide a brief description of how Mitigation Action #4 is being advanced through program development methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City provides free electric vehicle charging stations at both public libraries, City Hall, three beach front parks, and the Municipal facility.

---

**Q85**

**Yes**

Is equity being embedded into Mitigation Action #4 through program development methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Build partnerships between community-based organizations, the municipality, transportation agencies, and other stakeholders Offer technical assistance to community groups working to advance this goal Include a partnership with a community-based organization that focuses on job training in disinvested communities to help inform this project Include community leaders and members in program design Install chargers in public parking lots and high-use municipal facilities (parks, administration building) Ensure EV charging is available (and free including parking) for municipal employees Invest in electric busses

---

Page 64: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q86**

Please provide a brief explanation of the ways in which you are embedding equity into this action's program development methods?

Charging at the stations is free for users. Employees can charge at City Hall, the libraries, and the Municipal facility.

---

Page 65: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q87**

**Yes**

Is your local/tribal government advancing Mitigation Action #4 through policy methods?

---

Page 66: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q88**

Provide a brief description of how Mitigation Action #4 is being advanced through policy methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City has an EV ready ordinance.

---

**Q89**

**Yes**

Is equity being embedded into Mitigation Action #4 through policy methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Mandate EV charging infrastructure in future commercial & multi-family developments Deploy public EV charging infrastructure in low- and moderate-income parts of the community and with top employers Waive parking fees when an EV is paying for charging in that space Create a tiered procurement policy that ensures that plug-in hybrids and EVs are considered before any internal combustion engine vehicle Offer streamlined permitting, lower to no fees, and other incentives for EV charging projects

---

Page 67: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q90**

Please provide a brief explanation of the ways in which you are embedding equity into this action's policy methods?

EV charging infrastructure is mandated for multifamily and commercial developments with more than 50 spaces.

---

Page 68: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q91**

**Yes**

Is your local/tribal government advancing Mitigation Action #4 through budget/investment methods?

---

Page 69: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q92**

Provide a brief description of how Mitigation Action #4 is being advanced through budget/investment methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

Fleet replacement procedures include an assessment of electric vehicle options.

---

**Q93**

**No**

Is equity being embedded into Mitigation Action #4 through budget/investment methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Use EV vehicle tax rebate to invest in chargers Analyze fuel and maintenance savings from EV switch and use the savings to create a charger fund Subsidize the cost of charger installation in affordable housing development Create a group purchase program for residents to receive deep discounts on EVs Partner with car and lease dealerships to provide incentives for purchase of EVs by municipal residents. Pilot with those neighborhoods with the greatest disinvestment and/or those neighborhoods with the greatest VMT potential

---

Page 70: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Respondent skipped this question**

Please provide a brief explanation of the ways in which you are embedding equity into this action's budget/investment methods?

---

Page 71: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q95**

**Yes**

Is your local/tribal government advancing Mitigation Action #4 through education/outreach/advocacy methods?

---

Page 72: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q96**

Provide a brief description of how Mitigation Action #4 is being advanced through education/outreach/advocacy methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City has partnered with the Southern Alliance for Clean Energy to provide education on electric vehicles.

---

**Q97**

**Yes**

Is equity being embedded into Mitigation Action #4 through education/outreach/advocacy methods? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Provide multi-lingual and ADA accessible workshops educating the public on the benefits of EVs and how they can pay for themselves over time despite the higher upfront cost. Meetings/workshops for education/outreach should take place at a variety of times, including evenings, offer food and childcare to reduce barriers to attendance and participation. The meetings should be advertised by a community-based communications and outreach consultant/partner who is from the targeted community(ies). The advertising efforts should include a variety of mediums and start at least a week prior to the meeting. The communications/outreach consultant should reach at least 300 people in advertising for the meeting. Create/promote a charger network map. Make sure this map is well-promoted so people will feel comfortable making the switch

---

Page 73: Greenhouse Gas Emission Mitigation Priority Action #4 (Electric Vehicles)

**Q98**

Please provide a brief explanation of the ways in which you are embedding equity into this action's education/outreach/advocacy methods?

Education materials are virtual and available online with subtitles.

Page 87: Greenhouse Gas Emission Mitigation Priority Action #5 (VMTs)

**Q116**

Provide a brief description of how Mitigation Action #5 is being advanced through budget/investment methods. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City continuously improves streets throughout the City, including bike lanes and sidewalks. The City's iSIP program includes mobility improvements such as the recently completed 12th avenue project which included sidewalks and over 40 shade trees installed.

---

**Q117**

**No**

Is equity being embedded into Mitigation Action #5 through budget/investment methods? Below are several suggested ways that a local government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Consider incentives for the public to ride transportation, e.g. discount or make ridership free during rush hours. Develop grants and provide financial resources for the installation of infrastructure necessary to support telecommuting. Ensure annual budget allocation to maintain sidewalks and build them where they don't exist to connect low-income communities or communities of color to transit stops. Pay transit workers a living wage.

---

What resources could assist you in advancing this action?

---

Page 96: Adaptation Priority Action #1 (Internal Capacity Assessment)

**Q127**

Provide a brief description of the work you are advancing related to Adaptation Action #1. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City opened an Office of Sustainability and hired a sustainability manager. The sustainability manager helps to coordinate sustainable actions between departments.

---

**Q128****No**

Is equity being embedded into Adaptation Action #1? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Assess the capacity to include equity considerations, including community engagement & outreach. Assessment includes consideration of how well prepared the community is to advance adaptation initiatives in more vulnerable/disinvested communities. Assess agency understanding of inequity and historic environmental wrongs in the community (and how inequities may be exacerbated by government practices/policies). Provide training for staff, emphasizing the importance of correcting these issues and avoiding further harms in the future. Assess areas of the municipality that have been disinvested or are low-income. Staff has worked to build and maintain relationships and trust with community-based organizations, key thought leaders, and residents in the areas of the municipality which have been disinvested. Assess and collaborate with Departments that provide/direct social services to residents or that work on equity as adaptation partners.

---

Please provide any supporting documents under Adaptation Priority Action #1.

---

Page 99: Adaptation Priority Action #2 (Vulnerability Analysis)

**Q131**

Yes

Is your local/tribal government advancing activities related to Adaptation Action #2? Conduct vulnerability analysis of hazards related to climate change including, but not limited to, sea level rise, tidal flooding, saltwater intrusion, extreme weather, heat. The analysis should assess exposure and sensitivity of various assets including, but not limited to critical infrastructure, communities/populations, historic/cultural assets, transportation, natural resources, and economic assets. Assessment should seek to identify what factors contribute to elevated exposure and sensitivity, and what physical, social, institutional, human, and financial capacities exist to adapt, and where there are gaps.

---

Page 100: Adaptation Priority Action #2 (Vulnerability Analysis)

Page 101: Adaptation Priority Action #2 (Vulnerability Analysis)

**Q134**

Provide a brief description of the work you are advancing related to Adaptation Action #2. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City recently completed a Climate Change Vulnerability Assessment as part of the regional collaborative the Coastal Resilience Partnership of Southeast Palm Beach County.

---

**Q135**

Yes

Is equity being embedded into Adaptation Action #2? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Consider all properties, people, and communities equally in the Vulnerability Analysis or Assessment. The methodology should not prioritize or focus on areas with higher taxable value. If study scope includes proposing adaptation strategies, those strategies considered should be prioritized based on potential to reduce risk to human life and other key indicators based on community members' experiences. Include opportunities for meaningful community input as part of the vulnerability analysis process. Use community feedback and information based on stakeholder experiences in the data analysis. Incorporate community feedback via asset-mapping exercises, seek assistance with prioritizing/ weighing criteria for the vulnerability assessment, ground-truth the findings of the analysis, etc. Include a social vulnerability assessment as part of the overall vulnerability assessment. At minimum, Federal SOVI or SVI maps can be used, but ideally the assessment should be rooted in the community itself. Depending on the type of project, the following social factors may be relevant to include in your analysis: redlining, low- and moderate-income populations, energy burden, rent/cost of living burden, language spoken at home, vehicles per household, elderly residents, average year built of housing, and tree canopy, among others. Include an assessment of organizations in the community that may help advance the municipality's adaptive capacity, or organizations which will help communicate with populations frequently unengaged by government.

Page 102: Adaptation Priority Action #2 (Vulnerability Analysis)

**Q136**

Please provide a brief explanation of the ways in which you are embedding equity into this adaptation action?

The CCVA assessed socioeconomic factors as part of the analysis.

Page 106: Adaptation Priority Action #3 (Resilience Plan)

**Q141**

Provide a brief description of the work you are advancing related to Adaptation Action #3. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The CCVA includes a list of proposed adaptation actions which will be used to develop resiliency plans.

---

**Q142**

Yes

Is equity being embedded into Adaptation Action #3? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Provide multiple benefits or co-benefits in disinvested communities based upon community input. Prioritize the solutions/resources in the Plan by their potential to reduce risk rather than by geography, property values, or income. Engage and collaborate with the community as part of the development of the Plan. Ensure at least 50% of the solutions come directly from community members and/or organizations that represent community members from disinvested communities. Use an Equity Toolkit to identify and correct any unintended impacts (and potential benefits) of actions within that Plan on low-income disinvested communities, or communities of color. Ensure the toolkit for each action is made public for accountability and discussion. Develop metrics and milestones that are reported on publicly so the municipality can be held accountable. Set expectations with the community on the format and frequency of reporting. Ensure solutions sufficiently address all climate threats. Take into consideration how climate threats affect individuals and neighborhoods differently (based on various factors including social determinants of health). Include a mix of solutions including a mix of policy and capital projects. Capital projects should include a plan and budget for upkeep and maintenance. Include strategies that protect the lives and health of outdoor workers.

Page 107: Adaptation Priority Action #3 (Resilience Plan)

**Q143**

Please provide a brief explanation of the ways in which you are embedding equity into this adaptation action?

The climate change vulnerability assessment included socioeconomic factors in the analysis.

Page 108: Adaptation Priority Action #3 (Resilience Plan)

**Respondent skipped this question**

What resources could assist you in advancing this action?

---

Page 111: Adaptation Priority Action #4 (Risk Reduction & Planning)

**Q148**

Provide a brief description of the work you are advancing related to Adaptation Action #4. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City's most recent update of the Comprehensive Plan includes policies related to sustainability and climate resiliency.

---

**Q149****No**

Is equity being embedded into Adaptation Action #4? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Engage and collaborate with the community as part of the development of the Plan. Ensure at least 50% of the solutions come directly from community members and/or organizations that represent community members from disinvested communities. Design and write the Plan to protect all communities equally and encourage risk reduction in areas most vulnerable to the impacts of climate change. The Plan also takes into account unintended consequences—such as gentrification—and provides solutions to mitigate/diminish negative impacts posed by solutions. Include an equity statement and explicitly state how equity was included in the development of the Plan and how equity was integrated into the recommendations. For redevelopment-specific actions or plans, ensure they are designed to improve conditions and resilience for burdened or disinvested communities rather than restore them to their current condition. Use an Equity Toolkit to identify and correct any unintended impacts (and potential benefits) of any Plan, policy, or budget decision on low-income disinvested communities, or communities of color. Ensure the toolkit for each policy/plan/budget decision is made public for accountability and discussion. List the affirmative steps made to incorporate and to include community input. Proactively consider equitable relocation strategies wherever it may be necessary. Include ways to minimize/eliminate displacement and incorporate equitable outcomes for existing communities in all relevant Plans.

---

---

Page 116: Adaptation Priority Action #5 (Policy)

**Q155**

Provide a brief description of the work you are advancing related to Adaptation Action #5. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The City's comprehensive plan includes policies related to resiliency in the conservation element and the coastal element.

---

**Q156****No**

Is equity being embedded into Adaptation Action #5? Below are several suggested ways that a local/tribal government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Engage and collaborate with the community as part of the development of the Plan. Ensure at least 50% of the solutions come directly from community members and/or organizations that represent community members from disinvested communities. Ensure policy is written to protect all communities equally and that it encourages risk reduction in areas most vulnerable to the impacts of climate change. The policy should also take into account unintended consequences—such as gentrification—and provide solutions to mitigate/diminish negative impacts posed by solutions. Policies are written to improve the resilience of disinvested communities. Policies are written to ensure equal access to new or proposed technology (e.g. public EV charging locations). Policies are written to improve conditions for disinvested communities through stronger remediation requirements or stormwater considerations. Ensure contamination is not a barrier to adaptation. Remediate past harms while working to adapt to future threats, and take those future threats (like flooding) into consideration when selecting clean-up alternatives. Apply for EPA Brownfields grants if funding is the major obstacle. Use an Equity Toolkit to identify and correct any unintended impacts (and potential benefits) of any policy on low-income disinvested communities or communities of color. Ensure the toolkit for each policy decision is made public for accountability and discussion.

Page 121: Adaptation Priority Action #6 (Capital Projects)

**Q162**

Provide a brief description of the work you are advancing related to Adaptation Action #6. This is not meant to be an exhaustive list, but rather a list of the most impactful actions.

The iSIP program is systematically updating stormwater drainage and utility lines through City neighborhoods.

The City's IRIS program makes the City's waste water treatment plant a 100% reuse facility.

The City has systematically converted septic systems to sewer resulting in more than 99.9% of the City on sewer.

The City is renovating several waterfront parks (Rutheford Park, Silver Palm) and designing a new waterfront park (Wildflower). The designs of these parks include adaptations to sea level rise including protection of mangrove ecosystems (Rutheford) raising seawalls (wildflower) and including adaptive features such as floating docks (Silver Palm).

Beach management projects monitor sea level rise and changing beach conditions and adjust beach slope and dune cover to make beaches more resilient.

---

**Q163**

Yes

Is equity being embedded into Adaptation Action #6? Below are several suggested ways that a local/local government can embed equity into this climate action provided as supportive guidance. This is not meant to be exhaustive of every possible action. Respondents can include actions not included in this list. Engage and collaborate with the community as part of the development of the Plan. Ensure at least 50% of the solutions come directly from community members and/or organizations that represent community members from disinvested communities. Capital projects benefit all community members equally. Low-income disinvested communities, or communities of color are prioritized (i.e. for green spaces, resilience hubs, parks etc.) Prioritize resilience capital projects by the potential to reduce risk to human life and critical infrastructure rather than based on income or tax value. Display resilience capital projects on a map with underlying layers showing demographics such as race, income, etc. to visually show that investments are not only being made to benefit high-tax value and/or waterfront properties. This map should also speak to the amount of investment in different parts of the municipality, including disinvested areas. Use an Equity Toolkit to identify and correct any unintended impacts (and potential benefits) of any capital project on low-income, disinvested communities, or communities of color. Ensure the toolkit for each project is made public for accountability and discussion. Ensure capital projects also take into account unintended consequences such as gentrification and provide solutions to mitigate/diminish negative impacts posed by solutions. Ensure the burden of public funding for capital projects is equitable across communities. Include a plan for upkeep and maintenance for any capital project. List the affirmative acts of community outreach.

**Q164**

Please provide a brief explanation of the ways in which you are embedding equity into this adaptation action?

Capital projects are being planned city-wide.
