In the past several years we have advanced/completed work related to this priority action that is still relevant today.

We actively advanced activities related to this priority action in this reporting year (CY 2023).

**A Q19. Provide a brief description of the work you are advancing related to Mitigation Action #3. This is not meant to be an exhaustive list, but rather a list of the most important work.**

The City's Advance Fort Lauderdale Comprehensive Plan set a target of 20% renewable energy by 2030. The Sustainability Division has completed a renewable energy feasibility study. The City has reviewed and improved its solar permitting process, achieving SolSmart Gold designation. The City's \$190 million Parks Bond includes funding for solar operations which is likely to include renewable energy recommendations. The Sustainability Division has used FPL refund monies to install solar on City facilities. In addition, the City is exploring other opportunities to advance solar energy.

**Q20. Is equity being embedded into Mitigation Action #3? Please indicate your progress toward embedding equity in this action with "1" indicating no progress and "5" indicating full progress. For more guidance, visit the full document on the Compact website. The municipality should model best practices regarding solar energy i.e. identifying which parks, parks and fee-free Devote money/personnel to support and promote solar co-ops Provide education on lower cost ways for residents to go solar, such as SolarTogether a**

3

**A Q21. Please provide a brief explanation of the ways in which you are embedding equity into Mitigation Action #3.**

The City is partnering with Solar United to engage the community in signing up for the Solar Co-op. As part of the Parks Master Planning and Bond effort, community leaders are working to reduce barriers and soft costs for solar installations. One of the City installations of solar is on public facing buildings via Parks and Recreation buildings.
